2018 - 2020

Benidorm, Spain

Computer Engineering | **Universidad de Alicante**

2020 - Present

San vicente del Raspeig, Spain

PROJECTS

Rolgrama

SPA made with ionic and angular to manage Tabletop role playing events. Using Fire-base database.

Flamingo

Twitter clone made with ASP.NET and C# using SQL database and bootstrap for styling.

Distributed systems assignment

A distributed online multiplayer terminal game programmed in Python (ENGINE) and Javascript (REST API), where multiple services communicated using Apache Kafka mes-sage queue.

UAProjects

An issue tracker made with PHP and Laravel with user authorization and an SQL database.

More projects available in my website

An assembly game in z80, AI libraries and much more...
